## NOTES TO FINANCIAL STATEMENTS

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### Accounting Practices

The accompanying statutory financial statements of Lumbermens Mutual Casualty Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners (the "NAIC") *Accounting Practices and Procedures Manual* (the "Manual") and with accounting practices prescribed (including accounting allowances under Corrective Orders) or permitted by the Illinois Department of Insurance (the "Department").

The Company's reported surplus at March 31, 2011 and December 31, 2010 reflects increases of \$294.8 million and \$298.3 million, respectively, at those dates over what would have been reported without accounting practices prescribed or permitted by the Department, as illustrated in the following table and as described further below:

Prescribed or Permitted Practices	March 31, 2011	December 31, 2010	Increase/ (Decrease)

1. **Loss and LAE Reserve Discounting.** Pursuant to a prescribed accounting practice, the Company discounts its loss and loss adjustment expense ("LAE") reserves at 4.2% in the accompanying financial statements. Prior to 2003, the Company discounted at 3.5% (or the required statutory rate) only certain categories of liabilities on its statutory statements of admitted assets, liabilities and surplus ("balance sheet"), essentially the tabular discount on permanent total/lifetime benefit liabilities, pursuant to prescribed accounting practices. At March 31, 2011, the total amount of the tabular and non-tabular discount, included on the balance sheet and on Schedule P, was \$272.4 million; the total was \$279.0 million at December 31, 2010. With this prescribed practice, the Company's reported surplus exceeded what its surplus would have been under the tabular discount by \$200.2 million at March 31, 2011 and \$204.2 million at December 31, 2010.
2. **Prepaid Expenses.** Pursuant to a prescribed accounting practice, the balance sheet of the Company reflects as admitted assets the amounts that the Company has prepaid for claim handling services to two third-party administrators. The prescribed practice further allows the Company to admit its March 31, 2011 and December 31, 2010 prepaid expense assets primarily related to insurance and rent expenses. With this prescribed practice, the Company's reported surplus exceeded what its surplus would have been by \$15.6 million at March 31, 2011 and \$15.0 million at December 31, 2010.
3. **Provision for Uncollectible Reinsurance.** Pursuant to a prescribed accounting practice, the Company established a general provision for uncollectible reinsurance, net of a 4.2% discount, of \$14.6 million at March 31, 2011 and \$17.9 million at December 31, 2010. The change in the Schedule F penalty otherwise prescribed by the Manual would have approximated the change in the general provision for uncollectible reinsurance during the 1st quarter of 2011.
4. **Annuity Reinsurance Contracts.** Pursuant to a prescribed accounting practice, the balance sheet of the Company at March 31, 2011 and December 31, 2010 reflects as admitted assets the estimated value of certain annuity reinsurance contracts issued by Washington National Insurance Company, which is rated B+ (good) by A.M. Best. As reflected on the balance sheet, the annuity reinsurance contracts totaled \$13.3 million at both March 31, 2011 and December 31, 2010. The benefit to surplus of the prescribed practice at March 31, 2011 is approximately the same as December 31, 2010.
5. **Audited Financial Statements of Certain Subsidiaries.** For December 31, 2010, the Department granted a permitted accounting practice allowing the Company to forego the requirement to obtain audited financial statements for certain of the Company's subsidiaries and the Company has carried forward the permitted practice to March 31, 2011. At March 31, 2011 and December 31, 2010, such subsidiaries had a combined statement value (surplus) of \$7.6 million

## NOTES TO FINANCIAL STATEMENTS

and \$7.4 million, respectively. The Company believes that the statutory carrying values of these subsidiaries approximate the carrying values that would be determined if audited statements were prepared.

6. Funds Held with Reinsured Companies. Pursuant to a prescribed accounting practice, the balance sheet of the Company at March 31, 2011 and December 31, 2010 reflects as admitted assets funds held with reinsured companies that exceed the liabilities they are intended to secure. With this prescribed practice, the Company's reported surplus exceeded what its surplus would have been by \$6.0 million at March 31, 2011 and \$5.9 million at December 31, 2010.
7. Loss Based Assessment ("LBA") and Guaranty Fund Assessment ("GFA") Liabilities. Pursuant to a prescribed accounting practice, the Company calculates its March 31, 2011 and December 31, 2010 LBA liability, net of a 4.2% discount, based on an estimate of LBA payments to be made within two years of the date of the statutory financial statements. Additionally, a prescribed accounting practice allows the Company to forego the requirement to record an estimate of guaranty fund assessments that have been authorized by certain guaranty funds but not called. The benefit to surplus of these prescribed practices at March 31, 2011 is approximately the same as December 31, 2010.
8. Real Estate Joint Venture. The balance sheet of the Company at March 31, 2011 and December 31, 2010 reflects as other invested assets a real estate acquisition, development, and construction arrangement (ADC) as a real estate joint venture. As reflected on the balance sheet, the real estate joint venture is valued at \$13.2 million at March 31, 2011 and December 31, 2010. Pursuant to a prescribed accounting practice, the Company is allowed to increase the carrying value at March 31, 2011 and December 31, 2010 of the real estate joint venture by 50% of the difference between its December 31, 2010 cost and the fair value as determined by an external appraisal performed at December 31, 2010. With this prescribed practice, the Company's reported surplus exceeded what its surplus would have been by \$7.9 million at March 31, 2011 and December 31, 2010.
9. Unallocated Loss Adjustment Expense Reserve. Pursuant to a prescribed accounting practice, the Company established its March 31, 2011 reserve for unallocated loss adjustment expense ("ULAE") based on an estimate of ULAE payments to be made within two years of the date of the statutory financial statements. The prescribed accounting practice further directs the Company to include in the reserve amounts that the Company has prepaid for claim handling services to two third-party administrators. With this prescribed practice, the Company's reported surplus exceeded what its surplus would have been by \$6.9 million at March 31, 2011 and \$7.2 million at December 31, 2010.
10. Retroactive Reinsurance Agreements Treated as Prospective. Certain of the Company's reinsurance agreements entered into prior to 2003 were not reduced to signed written forms within the nine-month period required by the Manual and thus should have been accounted for as retroactive reinsurance. The Department granted a permitted accounting practice to the Company for the 2010 and 2009 statutory financial statements to record these reinsurance agreements as prospective contracts. In the absence of the permitted practice, the Company's restricted surplus would have increased, although its total surplus would not have changed. The Company has not quantified what the increase to restricted surplus would have been absent the permitted practice.
11. The Department has prescribed certain accounting practices that do not result in an increase to the March 31, 2011 and December 31, 2010 surplus of the Company, but it is reasonably possible that the Company's surplus reported in future periods will benefit from the following prescribed accounting practices.
  - a. Loss and ALAE Reserve Variability. Pursuant to a prescribed accounting practice, the Company has recorded an estimate for unpaid claims, losses, and allocated loss adjustment expense ("ALAE") related to direct business, less amounts ceded to reinsurers and discount, that is 5% less than management's best estimate. Under the direction of the Department, the Company has deferred the surplus benefit of this prescribed accounting practice at March 31, 2011 and December 31, 2010 by recording a deferred credit that is summarized within the "Aggregate write-in for liabilities" line item on the Company's balance sheet. The deferred credit may be recognized in future periods and benefit surplus if the Company's surplus were otherwise to fall below a minimum surplus amount as ordered by the Department. Absent the direction by the Department to defer this prescribed accounting practice, the Company's reported surplus would have exceeded what its surplus would have been without the prescribed accounting practice by approximately \$29.6 million at March 31, 2011 and \$30.8 million at December 31, 2010.
  - b. Assumed Loss and ALAE Reserves. Pursuant to a prescribed accounting practice, the Company has recorded an estimate for unpaid claims, losses, and ALAE related to assumed business, less offsets available to reinsurers and discount, based on an estimate of assumed reinsurance payments to be made within two years of the date of the statutory financial

## NOTES TO FINANCIAL STATEMENTS

statements. Under the direction of the Department, the Company has deferred the surplus benefit of this prescribed accounting practice at March 31, 2011 and December 31, 2010 by recording a deferred credit that is summarized within the "Aggregate write-in for liabilities" line item on the Company's balance sheet. The deferred credit may be recognized in future periods and benefit surplus if the Company's surplus were otherwise to fall below a minimum surplus amount as ordered by the Department. Absent the direction by the Department to defer this prescribed accounting practice, the Company's reported surplus would have exceeded what its surplus would have been without the prescribed accounting practice by approximately \$25.7 million at March 31, 2011 and \$26.2 million at December 31, 2010.

D. The statement value and fair value of bonds at March 31, 2011 were as follows:

	Statement value	Gross unrealized gains	Gross unrealized losses	Fair value
		(In thousands)		
U.S. governments	\$ 53,220	2,781	(9)	55,992
Special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of U.S. governments	21,147	207	(194)	21,160
Industrial and miscellaneous	394,151	7,702	(17,076)	384,777

Mortgage-backed securities	100,010	1,403	(809)	100,604
Total bonds	<u>\$ 598,376</u>	<u>13,419</u>	<u>(18,502)</u>	<u>593,293</u>

Bonds in an unrealized loss position are regularly reviewed for other-than-temporary declines in value. Factors considered in determining whether a decline is other-than-temporary include the length of time a bond has been in an unrealized loss position and the reasons for the decline in value. Assessments include judgments about an obligor's or guarantor's current and projected financial position, an issuer's current and projected ability to service and repay its debt obligations, the existence of, and realizable value for, any collateral backing the obligations, and the macro-economic and micro-economic outlooks for specific industries and issuers. Estimating the future cash flows of loan-backed securities also involves assumptions regarding the underlying collateral such as prepayment rates, default and recovery rates, existence of subordinated classes capable of absorbing losses, and third-party servicing abilities.

In performing its other-than-temporary impairment reviews, the Company, in consultation with its engaged portfolio manager, considers the relevant facts and circumstances relating to each investment and exercises judgment in determining whether a bond is other-than-temporarily impaired. Among the factors considered are whether the decline in fair value results from fundamental credit problems of the issuer, or is interest related, and the likelihood of recovering the amortized cost based on the current and short-term prospects of the issuer. Unrealized losses are determined to be temporary where such losses are primarily the result of market conditions, such as increasing interest rates, unusual market volatility, or industry-related events, and where the Company also believes it is probable that the Company will be able to collect all amounts when due in accordance with the contractual terms of the investment and, furthermore, has the intent and ability to hold the investment until the market recovers or maturity and, therefore, does not have the intent to sell the investment.

The bonds shown in the table below, nearly all of which are rated "A" or better, or are U.S. government obligations or are U.S. government agency mortgage-backed obligations and which, therefore, have minimal credit risk, are subject to normal market fluctuations. Based on the Company's evaluation of the bonds shown in the table below and the Company's intent and ability to hold the securities until they recover in value or mature, the Company does not consider the bonds to be other-than-temporarily impaired at March 31, 2011.

The risks inherent in reviewing the impairment of any investment include the risk that market results may differ from expectations; facts and circumstances may change in the future and differ from estimates and assumptions; or the Company may later decide to sell the security and realize a

loss as a result of changes in the specific facts and circumstances surrounding a bond, or the outlook for its industry sector or the economy.

As of March 31, 2011, the gross unrealized losses segregated between those that were in a loss position for more than twelve months and those that were in a loss position for less than twelve months were as follows:

In July 2003, the Company sold its NATLSCO, Inc. subsidiary and related claim service operations (together subsequently renamed "Broadspire"). The 2003 sales agreement with Broadspire provided for certain contingent consideration (earn-out) based on the revenue and net income of the sold business for a four-year period beginning January 1, 2004 (the "Earn-out Period"). The sales agreement required the acceleration and payment of the remaining earn-out if Broadspire sold assets of NATLSCO during the Earn-out Period. In an arbitration proceeding, the Company is disputing the accuracy of the amounts paid by Broadspire for the 2004 and 2005 earn-out periods. In addition, in a series of three transactions between December 2004 and November 2006, Broadspire disposed of NATLSCO and

certain of its assets. The Company is disputing the accuracy of Broadspire's calculations, and is involved in arbitration proceedings with Broadspire related to the asset sales. In accordance with the Manual, the Company is not carrying an admitted asset for any future recoveries from Broadspire. In the first quarter of 2011 the Company received approximately \$6.4 million as a result of the arbitrator's ruling on the 2005 Earn-out Period. During the second quarter of 2010 the Company received approximately \$3.5 million as a result of the arbitrator's ruling on the 2004 Earn-out Period.

Each payment of interest on and/or repayment of principal of the surplus notes issued by the Company in 1996 and 1997 may be made only with the prior approval of the Director of the Illinois Department of Insurance (the "Director"), which approval will only be granted if, in the judgment of the Director, the financial condition of the Company warrants the making of such payments and the Company's policyholders' surplus reflects sufficient funds to cover the amount of such payment. All payments of interest scheduled since January 1, 2003 have not been paid due to disapprovals by the Director based on the Company's financial condition. The cumulative amount of interest that was scheduled to be paid but is unpaid, plus the amount otherwise accruing in the first quarter of 2011 for which scheduled interest payment dates have not yet arrived, totaled \$510,700,000 as of March 31, 2011. In accordance with statutory accounting principles, this total amount is not reflected as a liability on the Company's statutory balance sheet as of March 31, 2011.

### 20. FAIR VALUE MEASUREMENTS

Fair values are estimated at specific points in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Fair values are based on quoted market prices when available and appropriate. Otherwise fair values for financial instruments are generally determined using discounted cash flow models and assumptions that are based on judgments regarding current and future economic conditions and the risk characteristics of the investments. Although fair values are calculated using assumptions that management believes are appropriate, changes in assumptions could significantly affect the estimates and such estimates should be used with care.

Fair values are determined for existing on- and off-balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and certain liabilities that are not considered financial instruments. For example, the Company's subsidiaries are not considered financial instruments, and their value has not been incorporated into the fair value estimates. Accordingly, the aggregate fair value presented does not represent the underlying value of the Company.

## NOTES TO FINANCIAL STATEMENTS

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

*Bonds:* Fair values for bonds are determined using quoted market prices from an orderly market at the reporting date for those or similar investments. If quoted market prices from an orderly market are not available, the fair value is determined using an income approach valuation technique (present value using the discount rate adjustment technique) that considers, among other things, interest rates, the issuer's credit spread, prepayments, performance of the underlying collateral for loan-backed securities and illiquidity by sector and maturity.

*Cash equivalents and short-term investments:* Fair values for money market funds are based on quoted market prices. Fair values for other instruments approximate amortized cost.

*Cash:* The statement value reported for cash approximates fair value.

*Unaffiliated common stocks:* Fair values for unaffiliated private placement common stocks are based on a discounted cash flow income approach and a cost approach.

*Notes receivable:* The fair value of notes receivable is determined in good faith by the Company's engaged portfolio manager based on the estimated timing of cash receipts and a discount rate appropriate for the borrower's credit status.

The statement values and fair values of the Company's financial instruments at March 31, 2011 and December 31, 2010 were as follows:

	2011		2010	
	Statement value	Fair value	Statement value	Fair value
	(In thousands)			
Financial instruments recorded as assets:				
Bonds	\$ 598,376	593,293	626,204	623,206
Cash, cash equivalents, and short-term investments	42,249	42,249	45,385	45,385
Unaffiliated common stocks	816	816	816	816
Notes receivable	0	0	0	0

The Company's financial assets carried at fair value have been classified, for disclosure purposes, based on a fair value hierarchy defined by SSAP No. 100, *Fair Value Measurements*. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's classification is determined based on the lowest level input that is significant to its fair value measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

*Level 1* - Inputs are unadjusted quoted prices for identical assets in active markets accessible at the measurement date.

*Level 2* - Inputs include quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Examples of other inputs include market interest rates, volatilities, spreads, yield curves, prepayment speeds and default rates.

*Level 3* - Includes unobservable inputs that are supported by little or no market activity and are significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what assumptions hypothetical market participants would use to determine a transaction price for the asset at the reporting date.

## NOTES TO FINANCIAL STATEMENTS

The following table summarizes assets measured at fair value at March 31, 2011:

	Fair value measurement category			Total statement value
	Level 1	Level 2	Level 3

Total common stock (unaffiliated)	0	0	816	816
Total	\$ 0	851	816	1,667

The Company's Level 2 residential mortgage-backed bond was priced by the IDC independent pricing service which primarily uses matrix pricing methodologies.

The fair value of the Company's Level 3 private placement common stock is the present value of the Company's share of the equity value of Facility Ins Hldg Corp's (FIHC) class A common stock per its most recent audited financial statements. The equity value was discounted from the August 1, 2017 Special Dividend date provided for in FIHC's Articles of Incorporation using a 5% discount rate.

There were no transfers of assets measured at fair value between any levels during 2011.

The following table reconciles the March 31, 2011 and December 31, 2010 statement values of assets measured at fair value using significant Level 3 inputs:

The incurred loss and LAE reserves related to current accident year is comprised of prescribed accounting practices of \$(62.2) million and development of \$0.2 million.

The current accident year prescribed accounting practices directed by the Department (see Note 1) is comprised of:

1. Nominal favorable loss and LAE reserve development of \$86.4 million comprised primarily of (a) a \$42.9 million decrease arising from a prescribed accounting practice to reduce direct loss and ALE reserves, less amounts ceded to reinsurers, by 5%; and (b) a \$36.4 million decrease arising from a prescribed accounting practice to record a two year estimate for assumed loss and ALE reserves, less offsets available to reinsurers, and; (c) a \$7.1 million decrease arising from a prescribed accounting practice to record a two year estimate for ULAE reserves; and
2. A reduction of discount of \$24.2 million comprised primarily of (a) a \$13.3 million decrease arising from a prescribed accounting practice to reduce direct loss and ALE reserves, less amounts ceded to reinsurers, by 5%; and (b) a \$10.7 million decrease arising from a prescribed accounting practice to record a two year estimate for assumed loss and ALE reserves, less offsets available to reinsurers, and; (c) a \$0.2 million decrease arising from a prescribed accounting practice to record a two year estimate for ULAE reserves.

The incurred loss and LAE reserves related to prior accident years is comprised of prescribed accounting practices of \$64.2 million and development of \$7.6 million.

The prior accident year development in 2011 is due to:
